

ADDA

Song / Video Project

Directions: Your job is to make a video (using either Windows Movie Maker (although this part may need to be done at home as Movie Maker is no longer on the computers in this lab or Premiere Elements) that includes your favorite song and the lyrics to the song.

Use the following directions to create your video:

1. Choose a favorite song (**be sure that it's school appropriate**—this includes lyrics, content and song meaning!!).
2. Find the lyrics to the song on the Internet.
3. Break up the lyrics to represent how they are sung in the song.
4. Create separate “wordart” in Photoshop Elements for each group of lyrics.
5. Using the video software of your choice, bring in the song and then add in the lyrics using appropriate timing so that they appear when they are sung in the song.
6. Add in personal pictures that pertain to the song and/or the person you may be giving this video to.

Saving: Save your file as a Windows Movie Maker file or Premiere Elements file.

Video: “Finish” your movie. See me for specifics.

A good example of this is at:

<http://www.youtube.com/profile?user=bnbharty#p/u/10/NiA6ki6f8ds> or see the ADDA2 drive for examples of what they did last couple of years.
